

# WEEK - I REPORT

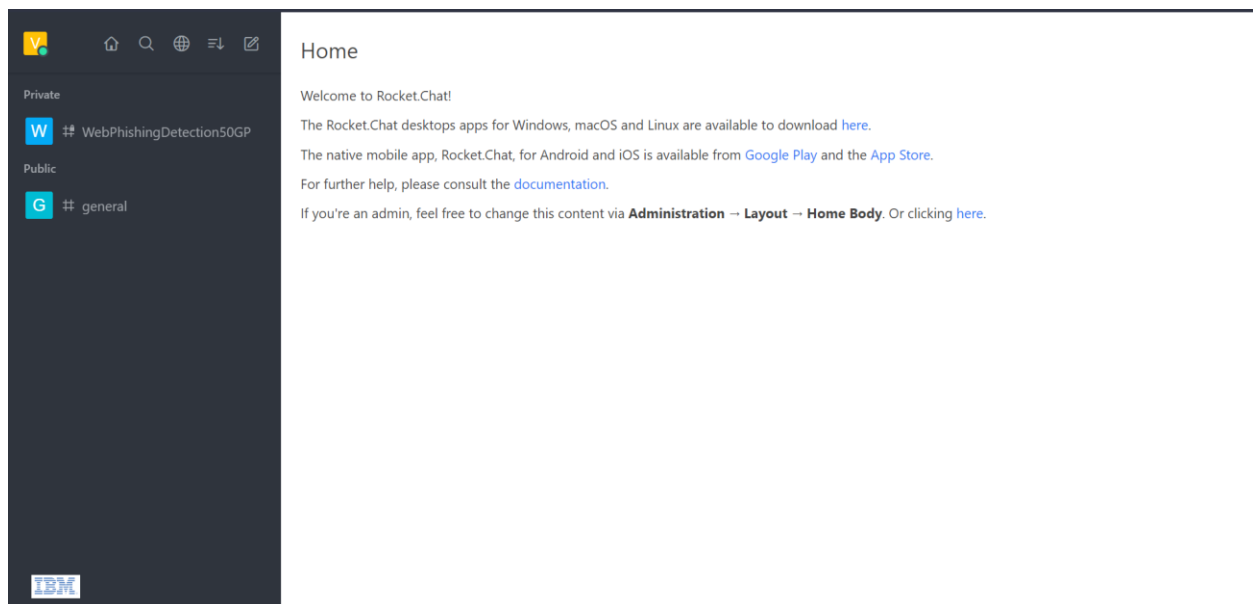

---

## Activity 1.1 - Get your project approved by college SPOC

Initially, the leader of the team was asked to login into the Smart Internz Web Portal and add team members for his team. So he picked 3 other members which includes SHRINIWAAZ K G, THARUN M V and SATHISH S and the leader VASANTHAZHAGAN R A. Then, we were asked to choose a project based on the domain of our choice. Finally, the college SPOC approved our project.

## Activity 1.2 - Download Rocket-chat application and join the respective project channel using the credentials

Leader and members, all received mail regarding the Rocket Chat Credentials and the download procedure. We downloaded them and joined the project channel.

---

### **Activity 1.3 - Refer the guided project template, pre-requisites**

As a part of week 1 activities, we were asked to go through the contents in the Guided Projects Template which included the Project Objectives, Prerequisites and other topics for the completion of the project.

### **Activity 1.5 - Sign-up for GitHub account to collaborate with Project repository**

All the projects, assignments and activities are supposed to be uploaded on Github. So we were asked to create a GitHub account and use the Username to collaborate with the Project Repository, so did we without any trouble.

### **Activity 1.6 - Install the necessary IDE's, Packages, set-up command line interfaces (CLI's)**

As the final part, the leader and all the members were asked to install the IDEs, packages, and CLIs that are required for the development of the project. So we we downloaded them based on Prerequisites for the project.
